EDUCATION

RCC Institute of Information Technology

B.Tech in Electronics and Communication Engineering (CGPA: 8.26/10)

Kolkata, WB

Sep 2021 – June 2025

Ballygunge Govt High School

Class XII (Percentage: 74%)

Kolkata, WB

2020 – 2021

Ballygunge Govt High School

Class X (Percentage: 80%)

Kolkata, WB

2018 – 2019

TECHNICAL SKILLS

- **Languages:** Java (OOP, Multithreading, Collections), Python, C++, JavaScript
- **Java Technologies:** JDBC, Java IO, File Handling
- **Frameworks/Tools:** Git, GitHub, Postman, Node.js, Flask, React, Spring
- **Databases:** MySQL, PostgreSQL
- **Web:** HTML, CSS, Tailwind CSS, JavaScript, React, Spring
- **Core Concepts:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Multithreading, File Handling, Exception Handling, Machine Learning
- **Soft Skills:** Problem-solving, time management, communication (English, Bengali, Hindi)

INTERNSHIP

PL Electronics

Intern – Software Developer and R&D

Belghoria, Kolkata

Sept 2024 – Nov 2024

- Preprocessed datasets related to railway relay systems to ensure high-quality input for machine learning models.
- Performed data normalization and formatting on fault records to prepare structured data for analysis.
- Developed and integrated frontend interface with backend services using Flask for real-time test result visualization.
- Contributed to the development of an automated relay testing system, improving fault detection accuracy and reducing manual effort by 40%.

PROJECTS

IRCTC Railway Ticket Booking System — Java, OOP, File Handling

- Developed a backend simulation of the IRCTC booking platform using Java and Object-Oriented Programming principles.
- Implemented seat allocation, waitlist handling using `queues`, and user registration system with file persistence.
- Used `HashMap` and `ArrayList` to manage train and user data. Optimized for 90% faster data retrieval.

Multithreaded Chat Server — Java, Sockets, Threads

- Built a multithreaded TCP-based chat server in Java that supports multiple client connections concurrently.
- Handled client input/output via `BufferedReader` and `PrintWriter`, ensuring non-blocking communication.
- Used `Thread` class and `Runnable` interface to scale up to 50 simultaneous client sessions.

Personal Portfolio Website — HTML, Tailwind CSS, JavaScript

- Built and deployed a responsive portfolio showcasing projects and skills, optimized using Tailwind and vanilla JS.
- Integrated smooth scroll, dynamic sections, and responsive layout. Reduced load time by 40% through CSS optimizations.

Link to QR Code Generator — Node.js, NPM

- Built a CLI-based utility to generate QR codes for URLs using `qrcode` and `inquirer` packages.
- Handled edge cases and added interactive prompts to improve usability. Achieved 100% command-line compatibility.

PID-based Line Follower Pick and Place Robot — Raspberry Pi, Python

- Presented at IEEE EDKCON 2024. Achieved 92% line-following accuracy and 85% pick-and-place success in dynamic settings.
- Used OpenCV and neural network-based PID tuning to improve precision by 45%.
